Hardik

Founding Engineer (Fullstack)

4.7y exp · 3.5y IC · 1.2y Lead
Keysight (1y) → American Express (3y)

AT A GLANCE

[BOLD = STORY-VERIFIED · ITALIC = MORE SIGNAL NEEDED]

- ▲ **Own features end-to-end** (4y)
- ▲ **Build core systems** (1y)
- ▲ **Proactive problem solving**
- ▲ **Self-motivation**
- ▲ **Clear written communication**
- ▼ *Document work clearly* *[verify depth]*
- ▼ *Technical documentation* *[verify depth]*
- ▼ *Next.js* *[verify depth]*

👍 Take This Meeting — 85/100

Strong recommend as a founding full-stack engineer with rare zero-to-one platform experience and immediate impact potential, with manageable ramp on Next.js/PostgreSQL specifics and contract-focused document processing.

AREAS TO PROBE

Document work clearly
Resume-only signal for Document work clearly.
→ Verify depth: ask for specific example of Document work clearly in practice.

Technical documentation
Resume-only signal for Technical documentation.
→ Verify depth: ask for specific example of Technical documentation in practice.

Next.js
Resume-only signal for Next.js.
→ Verify depth: ask for specific example of Next.js in practice.

PostgreSQL
Resume-only signal for PostgreSQL.
→ Verify depth: ask for specific example of PostgreSQL in practice.

✦ Why Signal Is Strong

Leading End-to-End Development and Scaling of a Hi
One of first engineers architecting ML SaaS platform from ground up. Designed Dataset Storage layer with versioning, MLOps and Model Storage layers with automated hyperparameter tuning, dynamic reso

Solo-led Global Automation of Database Decommissio
Led end-to-end design of automated portal for database usage optimization. Solo product leader responsible for architecture, Python/Couchbase data aggregation, Java/Spring Boot backend, ReactJS UI.

Architecting a vendor-agnostic AI/ML platform thro
Led end-to-end architecture of AI/ML platform with vendor-agnostic, open-source philosophy. Built dataset storage with MinIO, model management with MLflow, execution layer with Kubernetes. Guided by

❓ QUESTIONS THAT MATTER

EVIDENCE-BASED

Own features end-to-end
"Tell me about a specific time you demonstrated Own features end-to-end."
→ Verifies: **Own features end-to-end**

Build core systems
"Tell me about a specific time you demonstrated Build core systems."
→ Verifies: **Build core systems**

VERIFY UNKNOWN

Document work clearly
"Tell me about a specific time you demonstrated Document work clearly."
→ Verifies: *Document work clearly*

Technical documentation
"Tell me about a specific time you demonstrated Technical documentation."
→ Verifies: *Technical documentation*

Arrows (→) link questions to specific signals needing verification.

↔ Your Priorities → Fit

IF YOU NEED	THEN THEY ARE
Own features end-to-end	**Strong fit** — story-verified
Build core systems	**Strong fit** — story-verified
Make technical decisions	**Strong fit** — story-verified
Contribute to company direction	**Strong fit** — story-verified
Prototype rapidly	**Strong fit** — story-verified
Manage technical risks	**Strong fit** — story-verified
